

Special Issue

Sustainability in Tourism Activities and the Low-Density and Peripheral Territories

Message from the Guest Editors

Limited land, water resources, and overexploitation of tourism, among many other factors, make the ultra-peripheral and/or insular territories relevant case studies regarding their governance and their sustainable development. In fact, in the specific case of island regions, tourism regularly assumes itself as one of the main, if not the most important drivers of the regional economy, and therefore, it is critical to analyze this activity behavior based on the new challenges as the example of the desired sustainable development and growth. Contextually, the present Special Issue (SI) expects to cross and analyze the dynamics and patterns ongoing in these peripheral territories regarding sustainability and the related issues that may have an influence over it. Moreover, recent territorial policies, as well as the phenomenon of massive tourism, among many other actual hot topics, will be crossed and discussed in the present SI.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
