

## Special Issue

# Sustainable Urban Wastewater Management

### Message from the Guest Editor

Wastewater management is a most critical feature in modern societies, as it provides essential human health and environment protection. This Special Issue aims to compile the most recent and important advancements with regard to sustainable urban water management in the context of increasing the sustainability of the sewer system and wastewater treatment processes. We will thus welcome research works such as energy- and carbon-efficient wastewater treatment technologies; sewer corrosion and odour management; resource recovery from wastewater; greenhouse gas emissions from wastewater systems; critical analysis on sustainable urban water management; digital water technologies to improve wastewater management; socioeconomic aspects associated with sustainable urban water management; and any other topics that improve the sustainability of urban wastewater management.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
