

Special Issue

Sustainable Water Resources Management in the Changing Environment

Message from the Guest Editors

The main aim of this Special Issue is to collect results of research on the impact of climate change and human activity on the hydrological regime of rivers, lakes, and groundwater in different regions of the world, mainly in terms of transformation of the regime characteristics, their stability and predictability, and also quantitative and qualitative assessment of water resources with regard to their sustainable development. Particularly invited are papers on methods of detecting changes in the hydrological cycle in areas with diversified environmental conditions, e.g., with water deficits, and their consequences in quantitative, qualitative, physico-chemical, biological, socio-economic, and other aspects.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
