

# Special Issue

## Sustainable Acoustic Materials

### Message from the Guest Editors

The purpose of this Special Issue is to report on the latest research and development works carried out in the field of sustainable acoustical materials. Acoustical materials come in a variety of forms to provide sound absorption, insulation and vibration damping. Recent advances in material science, manufacturing processes, chemistry, and nanotechnologies are producing significant improvements in the design, production, and performance of specialized materials and metamaterials. These environmentally-friendly materials are manufactured through a responsible interaction with the environment to avoid depletion or degradation of natural resources and allowing for long-term environmental quality. Papers related (but not limited) to advances, development, innovation, analysis and/or optimization of sustainable acoustical materials or metamaterials. Papers can be related to fundamental research, and/or applications, related to design, modelling, testing, and/or manufacturing of acoustical materials, mixed and composite materials and to systems such as green roofs and green walls.

---

### Guest Editors

Prof. Jorge P. Arenas

Institute of Acoustics, Univ. Austral of Chile, Valdivia, Chile

Prof. Dr. Kimihiro Sakagami

Environmental Acoustics Laboratory, Department of Architecture, Kobe University, Kobe 657-8501, Japan

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
