

Special Issue

Sustainable Agri-Food Supply Chains: Advanced Engineering Strategies for Climate Change Mitigation

Message from the Guest Editors

This Special Issue (SI) aims at collecting emerging models, methods, support-decision tools but also advanced technology able to incorporate environmental sustainability targets in the design and management and control of FSC ecosystems. Articles are expected to cover the entire chain from growers to consumers, using environmental and economic sustainability as the primary lenses of assessment. Whilst relevant papers focusing on quantitative predictive and prescriptive methodologies will be considered, preference will be given to those contributions able to provide empirical evidence and practical implications of the environmental benefits obtained in real-world food industry cases. The authors of papers selected by the Scientific Committee of the 6th International Conference on Food and wine Supply Chain (8–11 June 2020, Bologna, Italy; <https://eventi.unibo.it/6th-internationalconferencefoodsupplychain-bologna2020>) will be encouraged to resubmit to this SI with a favorable publishing policy.

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
