

## Special Issue

# Sustainable Agricultural Production of Crop Plants

### Message from the Guest Editor

This special issue aims to publish high-quality research papers on methods to increase the sustainability of our agricultural systems, whether by alternative cropping practices (i.e. intercropping, agroforestry, vertical farming), urban systems, new improved crop varieties, innovative technologies to reduce inputs or through the development of new methods to assess the productivity and sustainability of our cropping systems. As a large proportion of the population are in developing countries with differing constraints to agricultural production (i.e. poor quality soils, low input agriculture, subsistence farming) papers are desired that cover a wide range of different environments and locations with differing amounts of resources or technology required.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
