

## Special Issue

# Challenges in Sustainable Agriculture and Cities Development: Innovations and Improvements, From Cradle to Grave, Including Connections between Agro-Food Productions and Markets

### Message from the Guest Editor

This special issue aims to create a collection of innovative scientific contributions (reviews, original research papers, short communications, letter to the editor and viewpoints) able to improve the sustainability of agro-food productions and cities development. In particular, scientific contributions related to the reduction of the environmental impacts in the following research fields are particularly welcome:

- Processing of raw materials and ingredients in food production.
- Processing technologies and equipment.
- Innovations in food distribution, logistic, and marketing.
- Improvement of the connections between food productions and local or global markets
- Waste and by-product treatment (in particular for the production of extracts with bio-active compounds)
- Sustainable alternative sources of protein
- Life-cycle assessment in food productions and cities development, including improvement strategies

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
