Special Issue

Preserving Ecosystem Services via Sustainable Agro-Food Chains

Message from the Guest Editors

This Special Issue comprises a selection of papers from the 164th EAAE Seminar on Preserving Ecosystem Services via Sustainable Agro-Food Chains that will be held in September 2018. Unambiguously, preserving the ecosystem and securing sustainability are very complex topics with interlinked dimensions. Agro-food chains, in the present economic system, have a core role since the mode in which they function influences both producers and consumers. The seminar covers the aforementioned topic following a broad approach, while also focusing on sustainable food chains, and how they can influence agro-food production and consumption as a whole. The seminar aims to bring together researchers and policy makers from the relevant fields and establish the relation between agro-food chains and the preservation and provision of ecosystem services. In addition, environmental, economic and societal issues will be tackled from a transaction perspective. Papers selected for this Special Issue will be subjected to a rigorous peer review process with the aim of wide dissemination of valuable research results.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
