

Special Issue

Technologies and Innovations for Sustainable Air Transportation

Message from the Guest Editors

COVID-19 has been a major disaster in the airline industry, including airlines and airports. To survive COVID-19, the air transportation industry, including airlines and airports, must develop innovative strategies and technologies for the economic, social, and environmental sustainability of its eco-system. This Special Issue will cover topics including (but not limited to): 1) identifying and developing innovative technologies in the air transportation eco-system; 2) airline/airport strategies to improve economic, social, and environmental sustainability; 3) policy developments and their implications to survive the COVID-19 crisis. Both theoretical and empirical contributions are encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
