

Special Issue

Sustainable and Clean Chemical Engineering Technologies

Message from the Guest Editor

The “Sustainability” journal has an open call for original research papers for special issue on “Sustainable and Green Chemical Engineering Technologies”. This special issue serves as a platform for researchers and engineers throughout the world to exchange and disseminate new ideas to address the theoretical and practical issues of sustainable production in the Chemical engineering technologies. We aim helping societies become more sustainable in several ways by preventing/minimization of the production of waste and emissions, while increasing efficiencies in the use of energy and resources. With a continuing transition to a more sustainable energies from fossil fuels, there is an immediate need of accelerating research & development in these areas to participate in a transition to clean, low-carbon energy systems. To do so, a rate of progress toward increased efficiency, de-carbonization, greater fuel diversity and lower emissions/wastes need to be greatly accelerated. We invite researchers in this field to submit their original papers for inclusion in this special issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
