Special Issue

Pathways to Sustainable Urban Form: Compact Cities Re-Imagined

Message from the Guest Editors

This Special Issue aims to present contributions from well-known scholars and practitioners whose theoretical or practical work addresses urban form such as compactness, density, and sustainability at various scales from city planning and urban design to public space and architectural design. The intention is to take a more holistic approach to sustainable urban form by understanding the relationships between its social and the environmental dimensions, and by advancing the theory that underpins it. The objective of this Special Issue is to advance and "re-imagine" the ideas and theories behind sustainable urban forms, and to investigate over a range of urban contexts and scales how far the boundaries of theory can be embraced within the umbrella of the term "compact city". Specifically, this Special Issue invites theoretical, empirical, and practice-based studies related to the keywords below, but other relevant topics will be considered. For further reading, please visit the Special Issue website. . PhD . PhD

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
