

## Special Issue

# Sustainable Comparative Urban and Regional Development in Times of Crisis

### Message from the Guest Editors

This Special Issue aims to build on the exchange of knowledge generated by comparative research on urban development. It intends to bring together scholarly work on the design of comparative research, its possibilities and limitations. As the scope of comparisons can extend to a large array of topics, we narrow it down to the way urban development responds to crises. We invite articles on a broad range of topics on both theoretical work regarding comparative formats and also in terms of results of comparative cases of urban development in times of crisis.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
