

Special Issue

Sustainable Construction Materials

Message from the Guest Editor

Dear colleagues, Sustainability is a recent thrust in many areas of engineering and science. Sustainable built environment is crucial to make our planet greener and a better place for the future generation. In this context, sustainable construction materials would play a significant role for the sustainable development of built environment comprising buildings and civil infrastructure, such as roads, bridges, and tunnels. This special issue of Sustainability is on “Sustainable Construction Materials”. It belongs to the section “Sustainable Engineering and Science” of Sustainability. You are humbly requested to contribute high-quality research or review articles to this special issue, emphasizing sustainability of building or infrastructure materials, utilization of recycled and industrial or agro waste materials, use of renewable materials, durability and service life of materials, sustainability assessment methods for materials, energy savings associated with application of materials, costs versus benefits of materials, and environmental protection in relation with fabrication and use of materials.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
