Special Issue

Energy Efficient Sustainable Cooling Systems

Message from the Guest Editor

The cooling systems are mandatory to maintain optimal media temperature and provide an environment for all the equipment to work properly, material kept safely, or humans to feel comfortable. However, several types of cooling technologies that are used to maintain the required cooling effect consume large amounts of energy. Recent trends in cooling systems focus on low energy consumption, long operation life, high reliability, and low environmental impact, as well as superior performance and application flexibility, as opposed to traditional cooling systems. Therefore, innovative cooling systems with efficient energy management are vital for many commonly used systems, including: HVAC applications, internal combustions engines, turbines, compressors, fuel cells, electric vehicles, batteries, lighting, electronics, solar photo-voltaic (PV) and PVT applications, etc. This special issue should include works discussing the above aspects, with some emphasis on cooling systems, as well as proposing methods, techniques, materials and interventions for the improvement of cooling technologies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
