

Special Issue

Sustainable Enterprise Excellence and Innovation

Message from the Guest Editors

We are at a juncture in history where the cumulative influences of human activity at individual, organizational and societal levels have created many wicked challenges that place individuals, organizations, communities and societies of current and future societies in peril. Such challenges span boundaries that include social equity; organizational structures, strategies and activities; domestic and foreign policy; and environmental policy and practice. Despite these challenges, there is hope. This Special Issue of Sustainability is dedicated to the hope of addressing wicked challenges in ways that can affect positive and sustainable change through innovation. Of primary interest in this Special Issue is sustainability-oriented innovation by individuals, collaborative groups, or organizations, including, but not limited to creation of or innovation in organizational structures, strategies and activities; research strategies, activities and results; supply chains; ways of working; and game-changing products, processes, or services.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
