

Special Issue

Sustainable Entrepreneurship and Eco-Innovation

Message from the Guest Editors

Entrepreneurship has been considered as a factor that promotes economic growth, generating higher employment and social welfare. This objective is achieved because entrepreneurs look for business opportunities and introduce technologies that allow them to be competitive and satisfy consumer demands. However, it has also been pointed out that by developing this activity, significant environmental damage has been created, due to the fact that part of that economic activity and the technological progress generated has been unsustainable. Due to this problem, the idea of sustainability has been introduced, which places more importance on achieving sustainable development objectives. This Special Issue aims to collect up-to-date research articles that explore and examine the relationship between sustainable entrepreneurship and eco-innovation and their effects economic activity in order to achieve the sustainable development objective and improve social welfare.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
