

## Special Issue

# Sustainable Entrepreneurship and Risk Management

### Message from the Guest Editors

Entrepreneurship is a key driving force of industry transformation and economic development, as well as an important form of self-employment. Recently, sustainable entrepreneurship has been advocated by both scholars and practitioners, with an emphasis on green and low-carbon entrepreneurship practices, responsible entrepreneurship, high-quality entrepreneurship and serial entrepreneurship. With regard to sustainable entrepreneurship, more attention must be given to the interaction between value chain and risk chain and to the enhancement of risk management by employing advanced information technologies such as big data, intelligent early warning and system simulation. This Special Issue welcomes contributions on the following subjects:

- Theory and cases of sustainable entrepreneurship
- Risk evaluation and prevention in low-carbon entrepreneurship
- Entrepreneurial failure and serial entrepreneurship
- Risk compensation policies for entrepreneurship and innovation
- Social responsibility and risk governance of entrepreneurial platform
- Intelligent monitoring and early warning of entrepreneurial risk
- Innovation risk management for environment related projects

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
