# Sustainable Environment through Sustainability Science – Environmental Studies in the Era of the UN Decade of Ocean Science for Sustainable Development (2021–2030)

### Message from the Guest Editors

The UN Decade of Ocean Science for Sustainable Development, using the philosophy of the SDGs, calls for accelerating sustainable solutions to all the world's biggest challenges, with climate change as one of the most important ones. Meeting the targets of Goal 13 (Climate) and Goal 14 (Oceans) will ensure that the targets of all other Goals are met and vice versa. Therefore, we invite research papers, inter- and transdisciplinary as well as review papers, contributing to the UN Decade of Ocean Science and the SDGs, which focus on ocean/climate issues as well as on ocean literacy and modern approaches to ocean environmental education.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
