Special Issue

Application of Artificial Intelligence and Virtual Reality Technology in Sustainable Fashion Industry

Message from the Guest Editors

For this Special Issue of *Sustainability*, papers exploring the novel application of artificial intelligence and virtual reality technology in the fashion industry are welcome, especially if aiming to improve efficiency with the adoption of fashion circular economy practices. Contributions to the reduction of energy and mass resources during the entire cycle of the fashion products and in particular during the design, production, use phase and optimization of the disassembly phase with the help of artificial intelligence and virtual reality technology are also useful. Papers selected for this Special Issue will undergo a rigorous peer-review process with the goal of rapid and broad dissemination of research findings, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
