Sustainable Fashion and Sustainable Luxury Markets

Message from the Guest Editors

The negative societal and environmental impacts of Fashion and Luxury Markets are clearly highlighted in the recent publication of the Intergovernmental Panel on Climate Change's Special Report (http://www.ipcc.ch/). These markets have received far less scrutiny than sectors such as food, agriculture, energy, and transportation, but the business, governmental, and societal change needed to address the shortcomings in these sectors is of growing and immediate interest. Since the earliest research into these field in the mid-2000's, there has been a slow but steady expansion of books and papers in these sectors. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
