

Special Issue

Sustainable Fruit Growing: From Orchard to Table

Message from the Guest Editor

Fruit producers and scientists are facing with more challenges than ever before, but also the demands of society, which aim to achieve sustainable production. Increasing of population, changing and improvement of eating habits with a higher proportion of fruit consumed has led to the expansion of orchards, but also the introduction of new technologies that improve yields and fruit quality while often neglecting the principle of sustainability. This special issue will cover various aspects that can improve sustainable production such as the possibility of introducing new fruit species into production, breeding and genetic improvement of cultivars and rootstocks, reducing environmental stress to which plants and fruits are exposed, deepening knowledge about the relationship between genotype and environment, fruit plant propagation, reduction of chemical harms to the environment, increase of fruit safety and security, more efficient control of pests and diseases, etc. The results of original researches are welcomed, and the submission of manuscripts of review papers by leading experts in these fields is also strongly encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
