Scientific Theory and Methodologies toward a Sustainable Future under Post-COVID-19 Transition Movement

Message from the Guest Editor

While COVID-19 has led to serious issues for all stakeholders from cities to the global community, this could also represent a precious opportunity to transform on-going urban and industrial systems to meet the targets of mitigation and adaptation for the pressing climate change impacts, resilient and efficient circular economy systems, and fundamentally comprehensive social challenges to reach the Sustainable Development Goals in the near future. Research papers on the following topics are invited: 1) Social observation and monitoring research to provide quantitative evidence for environmental limitation and social imbalance against sustainability in the long run; 2) Scenario design theories and methodologies for the sustainable future in the long run and possible demonstrative projects and actions in the short term; 3) Technology assessment of environmental engineering and socio-economic policy systems based on the local and global demand for the future sustainability; 4) Integrative participation systems for scientific simulation among multiple stakeholders for the socioeconomic and environmental transformation projects.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
