

Special Issue

Sustainable Horticulture: New Tools for Biosecurity

Message from the Guest Editors

Globalisation of food trade and human transport, in addition to environmental changes, have led to the upsurge of invasive insect pests and pathogens in novel habitats, which disturbs local ecosystems, impacts food production systems, and results in socioeconomic costs. Biosecurity systems implemented by each country are challenged by these new incoming risks. How can we secure and protect food production systems without compromising sustainability? This Special Issue will focus on new tools in biosecurity, both pre- and post-border, in the horticulture sector that contribute to sustainable food production. All types of communication, such as research articles, case studies, opinions, challenges or reviews, will be considered.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
