

Special Issue

Sustainable Industrial Systems –from Theory to Practice

Message from the Guest Editor

A great challenge for today's industrial sector is to meet all the targets set for reducing resource consumption and waste generation, while maintaining (or increasing) production output toward a viable economic development. In order to achieve that, industries should focus on implementing novel production methods, with an improved efficiency (in terms of energy, material, and water resource usage) which are at the same time environmentally benign and socially beneficial and acceptable. Moreover, industries should also aim to convert their production lines from linear to circular, by reusing resources, recycling waste streams and redesigning products, and adapting to the current paradigm shift of the circular economy.

The purpose of this Special Issue is to address issues of sustainability of industrial systems, from an economic, environmental and social perspective, focusing on real-life examples and applications. Manuscripts can address any step of the industrial value chain and lifecycle of products/services, from the development to the end of life stages. Researchers are encouraged to submit applied papers to explore the various aspects of sustainable industrial systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
