

Special Issue

Sustainable Innovation, Business Models and Sustainability Transition

Message from the Guest Editor

Business models (BMs) are now considered a key aspect of corporate strategy and describe the way “an organization creates, delivers, and captures value”.

BMs fluctuate as companies attempt to capture, generate and convey value, generating innovation. A particular kind of innovation in BMs relates to the inclusion of sustainability, which is an increasing societal demand. Sustainable business models (SBMs) are intended to integrate sustainability considerations into companies, not only addressing sustainability but also becoming a source of competitive advantage. It is urgent that we determine the key elements that make it possible to change a BM into an innovative SBM through empirical studies, survey, business case analyses and literature reviews.

This Special Issue seeks submissions addressing topics related to sustainable business models. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
