

## Special Issue

# Sustainable Lifestyles and Consumer Behavior—Production and Consumption Systems

### Message from the Guest Editors

This Special Issue is focused on sustainable lifestyles and consumer behavior. We welcome research that investigates how more resilient product and consumption systems can be planned and communicated, particularly in relation to individual lifestyles. Contributors from various fields are invited to submit their articles on the following topics: The importance of design, art and communication for transition and implementation of more sustainable resource-light production and consumption patterns in different lifestyles, real-world lab investigation of social and sociotechnical innovations for SCP, strengthening local economic cycles, the importance of public welfare orientation for more sustainable production, using the experiences from the COVID-19 crisis to make the importance of more sustainable production and consumption more visible and tangible, and the upscaling of footprint reduction potential by modeling of sustainable lifestyles and implementing international targets (e.g., 1.5 degree lifestyles, 8 ton society).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
