Special Issue

Next Steps for Governance of Sustainable Mobility Innovations

Message from the Guest Editors

New mobility services and technologies include the move towards both smart and shared mobility, micromobility and, more specifically, when looking towards the future, autonomous automobiles. Central to change has been the rapid development of digital network infrastructures, which, in addition to facilitating new creation of mobility services, are allowing individuals to access detailed real-time information to help plan journies, choose modes and offer seamless ticketing. Such integrated services are known as "Mobility-as-a-Service".

The purpose of this Special Issue is to gather original articles that investigate and offer solutions to the governance issues that may arise, or have already arisen from the introduction of new mobility services and technologies. In particular, we are interested in those problems that are not yet fully understood, such as the impact on social inclusion, the role of new forms of data or unanticipated consequences for active travel and health. The content of this Special Issue will add to the growing discourse on transport governance and mobility justice in respect to "smart" or "future" mobility.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
