

Special Issue

Sustainable Pavement Materials, Design and Construction

Message from the Guest Editors

Sustainability has become an integral part of most activities carried out in society today. Because of this, the pavement construction sector (one of the principal sectors in the field of civil engineering and, in turn, a major consumer of fossil fuels and natural resources and a notable producer of greenhouse gases) is currently seeking ways to reuse wastes and to reduce the economic and environmental impacts that its activities cause. This Special Issue is looking for papers that show the latest steps carried out in the pavement engineering sector to achieve more sustainable materials, design and construction procedures (which could lead to an efficient management of natural resources and foment the development of techniques that permit the reuse of wastes and reduce contaminant emissions). Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
