Sustainable Public Administration

Message from the Collection Editors

The 2030 Agenda for Sustainable Development with its 17 Sustainable Development Goals (SDGs) was agreed upon by 193 member states of the United Nations in September 2015. Given the size of the challenge to redirect unsustainable pathways towards sustainable development, state and nonstate actors alike are strongly encouraged by the agreement to contribute. The private sector, for example, is expected to introduce sustainable management practices and develop sustainable business models; sciences should contribute through the analysis and development of solutions; civil society is invited to participate inter alia in searching and testing new and more sustainable practices; and citizens are invited to support the endeavor through sustainable consumption.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
