

# Special Issue

## Sustainable Public Transportation

### Message from the Guest Editor

This Special Issue will consist of papers describing the state-of-the-art in sustainable public transportation systems. Activities in the field of public transport, intelligent and integrated transport systems, as well as the practical application of knowledge about passenger transport, design, and operation of public transport systems and processes, contribute to ensuring sustainable public transportation system development. This is achieved by providing conditions for the safe, efficient, and economic public transportation of people that can minimize the negative impact on the environment.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
