

## Special Issue

# Urban Analytics and Creation of Services for Sustainable Cities

### Message from the Guest Editors

The increasing population in cities puts a high pressure in municipality authorities regarding management of several city dimensions. In this sense, there is the need to develop new data-driven methods based on machine learning and artificial intelligence that take advantage of the data acquired, in order to describe and predict the spatial and temporal relations of disparate domains of the city using contextual information (e.g. climate, traffic, schools, events, restaurants and local accommodation). The Special Issue invites papers and reviews address challenges in city domains like: micromobility; waste management; parking; pollution; and crowd management, to support decision-making at municipal level. Papers which integrate the city domains with contextual information along with predictive techniques are encouraged. Case studies developed in cities using modern analytical spatio-temporal techniques and new methodological approaches contribute to the above-mentioned city domains, will also be considered. : Dr. Pedro Alexandre Reis Sarmento

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
