

Special Issue

Sustainable System Transitions toward a Circular Economy

Message from the Guest Editors

The Special Issue seeks to include research articles that apply wholistic systems analysis methods from economic, engineering, and/or the social and policy sciences. Cross-disciplinary studies are encouraged. Systems of interest range from the microscale (e.g., organizations, communities), mesoscale (e.g., supply chains, eco-industrial parks, cities) through to the macroscale (sub-national, national, or regional). Systems transitions may be sector-specific (e.g., ag-food systems, manufacture) or focused on materials or products (e.g., rare earth minerals, plastics, textiles, batteries). Approaches might include the application of traditional economic theories (e.g., rational choice theory or behavioral economics) to predict the uptake of CE approaches, products, and services; quantitative systems analyses such as techno-economic and/or life cycle assessments, material flows analyses, and/or environmental accounting; market analyses; sustainability assessments; soft systems methodologies to identify leverage points; triple bottom line models or empirical evaluations of economic, environmental, and social performance; or comparative case analyses of linear and CE systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
