

Special Issue

Sustainable Tourism Economics and Financial Management

Message from the Guest Editor

In today's era of globalisation and the pandemic, the economics and management of finance in the tourism sector are among the challenges of the sustainable adaptation of businesses. Institutions have motivated funding for the tourism sector to recover, with a demand for sustainable business action. In this SI, we focus on the relationships among debt financing and sustainable financial growth in the tourism industry. We are particularly interested in new ways of managing finance in the tourism industry with an impact on sustainable growth including, but not limited to, the following topics:

- New forms of financing in the tourism sector: crowdfunding, crowdlending, business angel, strategic partners, public subsidies, etc.;
- Supply chain supplier interactions as a formula for sustainable financing;
- Analysis of efficiency in financial management and its effect on sustainable growth, comparing regions and different models of the tourism sector;
- New forms of business organizations within the tourism sector that optimize financial resources and their impact on sustainable growth.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
