Special Issue

Sustainable Transport Planning and Decision-making

Message from the Guest Editors

The goal of the SI is to collect high-quality papers addressing contemporary challenges and innovation aimed at improving transport sustainability with respect to traditional planning objectives and decision-making process. Contributions can deal with state-of-the art research, models, policies, empirical studies, and case studies in this research area. A non-exhaustive nor binding list of possible topics of interests is reported below: Multicriteria decision-making approaches for transport planning;

Stakeholder engagement and participatory decisionmaking methods;

Transport planning and policies in the age of disruption; Transport policy and sustainability;

Spatial decision support methods and tools in transport planning;

Social and environmental sustainability of transport solutions:

New forms of mobility to enhance transport sustainability;

Emerging technologies for sustainable transportation systems;

Sustainable transport planning and decision-making in the aftermath of COVID-19. Keywords:

Public participation

Sustainable mobility

Transport decision-making

Shared mobility

Spatial planning

Multicriteria analysis

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
