

Special Issue

Sustainable Value Management–New Concepts and Contemporary Trends

Message from the Guest Editors

On the basis of the above-mentioned assumptions, the key issues to answer are the following:

- How to shape enterprises, including their business models, to the ability to generate sustainable value?
- How to define sustainable value?
- Which scientific concepts and practical experience should form the basis of a theory of sustainable value?
- How the creation of sustainable value can influence the success of enterprises?
- Can sustainable value be created, delivered, captured and appropriated to a similar degree?
- How co-creating value affects sustainable value?
- How to interpret sustainable value on capital markets?
- Can creating sustainable value affect the migration of values to the capital/financial markets?
- How to effectively manage sustainable value?
- Can sustainable value also exist in the public sector and how should it be defined there?
- How sustainable value is understood in various sectors of the economy?
- How does the creation of a sustainable value influence the financial and non-financial results of an organization?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
