

Special Issue

Sustainable Vineyard Management

Message from the Guest Editor

Ensuring the sustainability of viticulture is important because grapevine is economically viable in soils with reduced fertility not well-suited to other crops, demands relatively low amounts of inputs in dry regions, and occupies land in Mediterranean ecosystems that are global biodiversity hotspots and need a long time to return to the original state when no longer cultivated. This Special Issue has the aim of collecting success stories and ideas worth sharing that would improve the sustainability of vineyard management from multiple standpoints. Please consider contributing with experimental, theoretical, or policy works that relate to strategies aiming to reduce the environmental impact of the grapevine industry; increase the resilience of grapevine production to climate change; improve the efficiency of vineyard management and increase profitability; or evaluate and ameliorate the economic impact of grapevine production, the environmental footprint, and the social role.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
