# Sustainable Water Management: From Ancient to Modern Times and the Future

### Message from the Guest Editors

In historic times (ca. 1000 BC–330 AD), water and wastewater technologies were highly improved by the Greek civilizations and, later on, by the Romans, especially regarding their scale. It is important to know how historical information can help us to meet sustainable development in the future. Presently, global warming, climate change, and the water crisis, in addition to the growth of human population around the world, are big challenges. These challenges highlight the importance of water resource management to meet sustainable agriculture in the future. This Special Issue of *Sustainability*, focused on the evolution of sustainable water management, aims to address the abovementioned aspects. More specifically, we call for manuscripts which deal with sustainable water resource management practices in both urban and rural regions, and regulations and policies which could contribute to improve sustainability. The papers that address past, present, and future challenges of water resource management and represent solutions with regard to sustainability in either agricultural or urban water management are also welcome. For further reading, please visit the [Special Issue Website](#).

### Guest Editors

Dr. Vasileios Tzanakakis

Department of Agriculture, School of Agricultural Sciences, Hellenic Mediterranean University, 71410 Heraklion, Greece

Dr. Mohammad Valipour

King Abdulaziz University, Jeddah 21589, Saudi Arabia

Prof. Dr. Andreas N. Angelakis

National Foundation for Agricultural Research, Institute of Crete, Greece. (Retired)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
