

Special Issue

Sustainable and Smart Transportation

Message from the Guest Editors

The sustainability of a transportation system is a major concerning factor for urbanization, as evidenced by the ever-growing problems of air pollution issues in major cities. While the growing population and migration do not have too much control to overcome the widespread use of public and personalized vehicles, they have destroyed our global environment. Therefore, the expansion of urban transportation systems should be carefully planned for sustainability: so-called sustainable and smart transportation. The research scope of this Special Issue includes but is not limited to the following aspects:

- sustainable transportation
- green optimization
- energy-efficient technology
- smart transportation
- machine learning
- swarm intelligence
- congestion mitigation

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
