

## Special Issue

# Sustainable Materials for Food, Biotechnology, and Environmental Applications

### Message from the Guest Editors

Products made from renewable and bio-sustainable materials have become an important part of the development of new materials. Their growing use is driven by a variety of factors, including the need for sustainable growth, environmental friendliness, safety, and health. At present, bio-sustainable materials are being given more attention and applied in fields such as medicine, food, the environment, etc. This Special Issue entitled “Sustainable Materials for Food, Biotechnology, and Environmental Applications” welcomes the submission of full articles, short communications, and review articles. This Issue aims to present research in bio-sustainable materials, including protein, natural polysaccharides, lignin, biological acids, and nucleic acids as materials, with an eye toward their application.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
