

Special Issue

Technologies for Developing Sustaining Foods for Specialized Missions

Message from the Guest Editors

We are co-editing an invited Special Issue of *Sustainability* entitled “Technologies for Developing Sustaining Food Items for Specialized Missions”. This compilation will concern novel processing technologies for volume/weight reduction and caloric densification, as well as preservation techniques that ensure the quality of these products during prolonged storage. The proposed Issue will be well-situated within the recent literature due not only to the current interest in these technologies, but also to the recent ground-breaking advancements seen in the area. The authors are at the forefront of these research areas, all having presented at recent international conferences and having published on related topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
