

## Special Issue

# Energy System Sustainability

### Message from the Guest Editor

This Special Issue welcomes the submission of original studies and reviews that addresses the analysis, methods or tools used to support an integrated understanding of energy system sustainability and its necessary technological and structural transformations. Topics we aim to cover include: modelling tools and assessments for energy system transformation towards sustainability, the interlinkages between energy and other SDGs in energy system planning, innovative and sustainable solutions for energy systems, environmental, social and economic impact assessment of energy system development, energy efficiency, low-carbon technologies, renewable energy, energy justice and resources consumption in energy system transformation, policy assessment to support the development of a future sustainable energy system.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
