

Special Issue

Advanced Research on Smart Grid, Energy Storage and Distribution Systems

Message from the Guest Editors

Due to the increasing renewable energy in distribution systems, system architectures have changed from traditional power supply for loads to complex systems with distributed generation. For system operation, information and communications technologies are applied to collect all equipment status and coordinate with the energy storage system to ensure the power quality of the distribution systems. Therefore, this Special Issue will provide a forum for the discussion of the technological applications of smart grids, planning and regulation of energy storage systems, auxiliary services of power distribution systems, etc. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
