Sustainable Building Environment

Message from the Guest Editor

The civil construction industry, which is responsible for the building environment, has a major impact on the social and economic development of a country. Meanwhile, the civil construction industry is considered one of the most polluting economies in existence and a major enemy of sustainable development. This negative scenario highlights the need for reforms in terms of work process methodology and demands the use of newly developed techniques and technologies. Due to the ever-increasing pressure from society and health organizations, sustainability becomes an especially important concern within the civil construction industry. The adoption of new concepts, such as BIM, energy-efficient buildings, lean and green construction, material reuse, life cycle assessment, etc., is growing as processes and technology evolve. The integration of these new concepts and technologies can help in the development of optimized solutions, which are more economic and reduce the negative impact this industry has in the environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
