Economic and Environmental Concerns Regarding Agri-Food Products Within the Context of Sustainability

Message from the Guest Editors

Potential research areas may include, but are not limited to:

- The environmental and economic challenges of food production in the sustainability era;
- Evaluating the environmental impact of agri-food products—best practices and policies;
- The role of digital technologies in sustainable agri-food supply chains;
- Innovations in waste reduction and the circular economy in the agri-food sector;
- Digital transformation in the global agricultural supply chains;
- The environmental footprint of agri-food products and the demand for transparency of sustainability metrics;
- Policy and regulatory frameworks for sustainable agri-food systems.

We look forward to your contributions to the development of knowledge on this significant topic.
