# **Special Issue**

# Food Science: Innovative Techniques, Quality Control, and Sustainability in Food Processing

### Message from the Guest Editors

The food industry faces increasing challenges in ensuring sustainability while maintaining food quality, safety, and nutritional value. Traditional food processing methods often lead to high resource consumption, nutrient loss, and environmental impact. This Special Issue explores innovative technologies that enhance efficiency, reduce waste, and improve food quality while promoting sustainability. Key topics include sustainable post-harvest treatments, smart packaging, bio-based preservatives, minimal processing techniques for plant-based foods, and innovations in meat and dairy processing, alternative proteins, and microbial fermentation. This issue will address defining and quantifying sustainability in food processing, assessing socio-economic benefits such as food security, affordability, and employment, and exploring policies and regulations that support sustainable food technologies. By contributing new insights and frameworks, this Issue will help researchers, industry professionals, and policymakers advance sustainable food processing. We invite original research, reviews, and case studies to drive a more resource-efficient and environmentally responsible food industry.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
