

## Special Issue

# Mountains Under Global Change

### Message from the Guest Editor

Despite there being no unitary definition of “mountain” on an EU or worldwide scale, mountains cover roughly a fifth of the world’s land mass and are home to one tenth of the world’s population. The global changes, including the degradation of natural resources, biodiversity loss, climate change, unsustainable supply and value chains, often cause irreversible impacts on fragile mountain ecosystems. Measures to combat the effects of these global changes demand innovative solutions and transdisciplinary cooperation; still, a significant gap remains in the understanding of ecological systems and anthropogenic processes and in their larger-scale implications. Further, the current challenges in resource use will have to involve new stakeholders with new, innovative ideas, and their management will have to have a central role in the socio-ecological transformation of mountain communities. The focus of this Special Issue is to research, discuss, compare, and develop strategies and innovative solutions to tackle the global change challenges faced in mountain areas.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
