

Special Issue

Sustainability in Industrial Engineering and Engineering Management: 2nd Edition

Message from the Guest Editors

- Nowadays, sustainability has become an essential part of managing industrial organizations and service sectors. Sustainability is fast becoming a necessity rather than a trend to achieve the optimal use of resources, energy, and water that helps mitigate environmental impact, reduce total lifecycle cost, generate profits, and promote social responsibility. The employment of sustainability in industrial engineering and engineering management can successfully increase operational efficiency and reduce waste, reach new customers and increase competitive advantage, strengthen reputation and build public trust, build long-term viability and success, and respond to regulatory constraints.
- The main objective of sustainability is to meet the needs of the present without compromising the prospects of future generations. In line with this, the aim of this Special Issue is to promote sustainability in industrial engineering and engineering management so that researchers and practitioners in these fields can address its implementation from an economic, environmental, and societal point of view.
- We are looking forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
