

## Special Issue

# Towards Integrated Watershed Governance for Sustainable Production and Social-Ecological Systems

### Message from the Guest Editors

It is with great pleasure that we ask you to share your novel research results in the field of integrated watershed governance for sustainable production, social-ecological system, hydrology, hydraulics, water quality, environment, and climate change adaptation in a broad sense to the Special Issue. Integrated water management in watershed governance plays a significant role in building sustainable cities and societies considering water availability, hydroclimate variability, water pollution, and ecological impairment. This special issue is envisioned to showcase the state-of-the-art in the adaptation and use of observed data for social-ecological systems, water resources, water quality, aquatic ecosystems, and the natural environment. Potential topics include, but are not limited to:

- Integrated water governance
- Water resources management
- Sustainable social-ecological systems
- Hydrological/environmental modeling
- Water quality monitoring
- River ecosystem resilience
- Geomorphological processes and characteristics
- Water policy
- Environmental assessment
- Natural disaster risk analysis
- Machine learning technology

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
