

Special Issue

Sustainable Agriculture, Aquaculture and Livestock Practices: Enhancing Food Supply Chains for a Resilient Future

Message from the Guest Editors

This issue seeks to present research and case studies that demonstrate how these sustainable practices can enhance food security, improve social well-being, and build resilience against climate change and other challenges. It aims to contribute to the ongoing discourse on resilience and ways of enhancing future supply chains by providing insights and solutions that support the transition towards sustainable systems. This aligns with the scope of the journal on land and aquatic ecosystems maintenance, biodiversity preservation, and applications of sustainability. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but need not be limited to) the following:

- Climate-smart agriculture;
- Climate-smart aquaculture;
- Sustainable fisheries;
- Organic farming;
- Agroforestry;
- Integrated pest management (IPM);
- Innovation and technologies;
- Agribusiness;
- Sustainable livestock production.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
