# Sustainable Transportation and Policy Planning in City Development

# Message from the Guest Editors

Transportation systems are integral to the development of societies, playing a major role on a socio-economic level. However, although the transport sector possesses a vital role, this does not negate the existence of problems caused by this sector. In and around most big cities, the capacities of the existing road networks are often saturated or even exceeded. An immediate consequence of this is the appearance of enormous problems, congestion being the most influential. This can have negative impacts on society and the environment, such as the loss of time, increased fuel consumption, automobile exhaust pollution, increased product prices, etc. Improving travel efficiency by reducing congestion is tantamount to boosting both production and consumption. One of the best strategies to improve the quality of transport in cities is sustainability in traffic management.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
